Anton Strapi Developer

I have been working as a Front-end developer for 3+ years. I am experienced in creating user-friendly interfaces and web apps using React, Next.js, Node.js, and Strapi CMS. I also have experience with animation libs (Framer motion, GSAP, Three.js, Matter.js) and Digital Ocean services.

Throughout my career, I have participated in projects of varying complexity (Creative landing pages, blogs, financial platforms, apps, etc).

I believe that big things start with small details. Creating interfaces is my passion.
