

Bohdan .Net Developer

A highly skilled .NET C# developer with 5+ years of experience, including experience as a team leader and the ability to build excellent relationships with colleagues and clients. I have practical knowledge of algorithms, experience in designing and implementing different architecture web systems based on .Net Framework and .Net Core, designing and developing databases, and deploying and managing apps with Azure.

EXPERIENCE

JetSoftPro Web Developer

July 2017 - January 2023

Design and development of desktop and web services based on .Net Design and development of databases Work in teams of different sizes Working in various roles in the team (regular dev, dev-team leader, dev-project manager) Experience with Scrum and Kanban Design and development from scratch/ and extension of existing functionality rewriting/ work with legacy projects Designing a testing strategy and writing unit tests Used Git for version control Collaborated with colleagues and clients to deliver high-quality solutions Worked on a range of projects from inception to delivery.

Project 1, NDA Backend Developer

Tech Stack: .Net Core 3.1, Azure DevOps, EntityFramework, MSSQL

Responsibilities:

- Development;
- Code review;
- Deployment;
- Writing tests;
- Swagger documentation.

Project 1 was developed using .Net Core 3.1 and Azure DevOps for development and deployment. As a Backend Developer, my responsibilities included developing the backend components of the project, conducting code reviews to ensure code quality, deploying the application, writing tests for the functionality, and documenting the API using Swagger.

Project 2, NDA Team Lead

Tech Stack: .Net Framework 4.6, ADO.Net, MSSQL, WPF

Responsibilities:

- Development;
- Code review;
- Swagger and Confluence documentation;
- Client communication;
- Architectural decisions.

SKILLS

C#, .NET, MVC, Web API, Entity Framework, MS SQL Server, JavaScript, Swagger Git, Azure DevOps, Docker, Design patterns, SOLID Algorithm development and optimization Strong analytical mindset and problem-solving skills Excellent communication skills, with proficiency in English Attention to detail, sense of responsibility, and dedication to success

LANGUAGES

English (Intermediate)
Ukrainian (Native)

perfsol

Project 2 was built using .Net Framework 4.6 and employed ADO.Net for data access, MSSQL as the database, and WPF for the user interface. As a Team Lead, my responsibilities included overseeing the development process, conducting code reviews, documenting the API using Swagger, and documenting the project architecture in Confluence. Additionally, I communicated with the client and made critical technological decisions.

Project 3, NDA

Backend Developer

Tech Stack: .Net Core 3.0, Entity Framework, Docker

Responsibilities:

- Development;
- Code review;
- Writing tests;
- Swagger documentation.

Project 3 utilized .Net Core 3.0 as the framework, Entity Framework for data access, and Docker for containerization. My responsibilities included developing the backend functionality of the application, performing code reviews, writing tests to ensure the quality of the codebase, and documenting the API using Swagger.

Comarch

Junior Developer

October 2016 - July 2017

Developed desktop applications using C# WinForms and WPF Managed databases using MS SQL Server Worked on a range of projects from inception to delivery

Responsibilities:

- Developing desktop applications;
- Analysis of projects;
- Implementing new features to existing programs;
- Projects testing and review;
- Teamwork.

Tech Stack: Scrum, Jira, SVN, Windows Forms, WPF, SQL

EDUCATION

Lviv Polytechnic National University

Master of Computer Science, Artificial Intelligence (2013 - 2018)
